President of the Republic of Burundi

Geography of Burundi

One of the smallest countries in Africa, Burundi is landlocked and has an equatorial climate. Burundi is a part of the Albertine Rift, the western extension of the East African Rift. The country lies on a rolling plateau in the centre of Africa. The average elevation of the central plateau is 1,707 m (5,600 ft), with lower elevations at the borders. The highest peak, Mount Heha at 2,685 m (8,810 ft), lies to the south East of the capital, Bujumbura. The source of the Nile River is in Bururi province, and is linked from Lake Victoria to its headwaters via the Ruvyironza River. Lake Victoria is also an important water source, which serves as a fork to the Kagera River. Another major lake is Lake Tanganyika, located in much of Burundi's southwestern corner.

Burundi's lands are mostly agricultural or pasture. There are two national parks, Kibira National Park to the northwest (a small region of rain forest, adjacent to Nyungwe Forest National Park in Rwanda) Ruvubu National Park to the northeast (along the Rurubu River, also known as Ruvubu or Ruvuvu). Both were established in 1982 to conserve wildlife populations.

Economy of Burundi

Burundi's largest industry is agriculture, which accounted for just over 30% of the GDP. Subsistence agriculture accounts for 90% of agriculture. The nation's larg-

est source of revenue is coffee, which makes up 93% of Burundi's exports. Other agricultural products include cotton, tea, maize, sorghum, sweet potatoes, bananas, manioc, beef, milk, and hides. Subsistence farming is highly relied upon.

Some of Burundi's natural resources include uranium, nickel, cobalt, copper, and platinum. Besides agriculture, other industries include: assembly of imported components; public works construction; food processing, and light consumer goods such as blankets, shoes, and soap.

Burundi is part of the East African Community and a potential member of the planned East African Federation. Economic growth in Burundi is relatively steady.

Currency

Burundi's currency is the Burundian franc (ISO 4217 code BIF)

Monetary Policy is controlled by the central bank, Bank of the Republic of Burundi.

Bujumbura Mayorship

General Jimmy HATUNGIMANA
Mayor of Bujumbura City

Charles BAHIZI
Chief of the Staff of the Mayor

Christopher KINSHASA
Socio Cultural Advisor

Ir josélyne NIMPAGARITSE
Development Advisor

1. Presentation

Bujumbura Mayorship is one of the eighteen provinces of Burundi. It consists entirely of the city of Bujumbura, Burundi's former capital, actual economic capital of the country. The municipal administration is organized into a central administration and a District administration.

It is directed at the highest level by an advisory body that is the Municipal Council and at the head of the institution, the Mayor is directly responsible. The Mayor is surrounded by the chief of staff five advisors and eight departments make up the town hall. The services of the town hall are housed in a building newly built by the town hall and recently

inaugurated called HOTELDEVILLE. This seven floors building also houses the private services for different businesses.

2. The Current Mayor and his Vision

The current Mayor's name is Commissary of Police Jimmy HATUNGIMANA. Since he started to lead the Bujumbura Mayorship, he has announced an urgent program; that of making the city peaceful, clean and attractive. With this context in mind, he launched the campaign to fill potholes in the streets of urban roads and the removal of waste scattered or deposited in a disorderly manner in different places of the city of Bujumbura.

BURUNDIAN TEA AUTHORITY BURUNDIAN HIGHLANDS TEA SIMPLY THE BEST

Burundian Tea Authority was created by presidential decree n°1/79 of July 30, 1971. Its main mission is to promote of tea cultivation in Burundi through the supervision of small producers, the management of industrial plantations, the tea processing and dry tea marketing.

In the same perspective of promoting this culture of rent in soils suitable for tea growing and community development, OTB plans to build a new tea factory in MATANA. This will receive an average of 10,000 tons of green leaf to obtain 2,000 tons of dry tea per year. To win this bet for the current fiscal year, OTB set up 2,200,000ha of tea plants which will plant more than 150 ha and 188,315 eucalyptus plants which will plant more than 80 ha of afforestation.

Briefly, this project will increase substantially the contribution of foreign currencies in the country, create jobs and other economic social structures who will be based around the factory. To strengthen its reach and thus keep its brand equity; the competitiveness of the Burundian dry tea produced is one of the key goals for success. Therefore, the samples that are well classified will serve as benchmark (reference) for the batches produced in the factories.

From July 20 to 22th,2022 at the Hotel du Lac Tanganyika, the Burundi Tea Office jointly with EATTA Tea Trade Association of East Africa hosted the 5th convention and tea exhibition. More than 300 representative delegates more than 25 countries were present. Under the theme “Managing for the future practices for the sustainable tea trade”, it was an opportunity to:

- *making contact, finding new markets of selling tea
- *exchange and consultation between the different actors working in the teasector,
- *identify challenges and gaps in order to develop recommendations,
- *giving gifts to the best tea producers

Women are the heart of family balances and play a crucial role in terms of development: 9,800 women joined to the cooperatives which, thanks to the latter, have generating incomes in commercial activities and granting credits. Finally cooperatives had largely contributed to considerable progress stimulating the rural economy while promoting inclusive development.

Concretely with associative movements there has been:

- *creation of FONSEDEV (Solidarity Fund for Development),
- *purchase of 21 shares in Twitezimbere micro-finance,
- *purchase of green leaf transport vehicles.

Visit of the Vessel Construction Site
by His Excellency the President of
the Republic of Burundi

MUSUMBA CARGO is a new project company that has a double mission, namely the creation of employment and the promotion of maritime and lake transport in Burundi. The maritime transport in Burundi constitutes a pillar for the trade and the isolation. Burundi being a landlocked contry, roads as well as ports on Lake Tanganyika remain the only means to ensure imports and exports.

The project for the exploitation and processing of gold dumps by the SOTB (Société de traitement des Terrils d'or au Burundi) was motivated by the fact that studies already conducted on gold processing techniques in Burundi have revealed artisanal miners do not recover all the gold contained in the ores due to the rudimentary processing methods. They only recover gold that is visible to the bare eye. This project is located on the Nyungu hill in Bwasare zone of the Gasorwe, Muyinga province.

MAGASIN IRAKOZE

Materiaux de Construction

Specialized in selling construction materials, the IRAKOZE shop was created in 2001. It has around a hundred employees and distributors located in all provinces of the country.

«The secret behind our success is this familial passion that has always thrilled us. We practice our passion, not to amass fortunes, but to serve the country and the people», Oscar BIZINDAVYI

Our success: Good management and anticipation of needs

«We sought after how to increase the capacity of our stock to avoid any kind of stock falling-out. This allowed us to satisfy the demand. We couldn't afford a situation where a customer places an order that we weren't able to fulfill. So we anticipated. Each order placed, whatever its nature and size, has been satisfied. We were always prepared for this potentiality».

Our strength trump: An extraordinary bond with our customers

«We have established relationships with international partners who provided us with original materials. From Turkey, for example, we import corrugated sheets and rebars»

BETAGAS

LITE SAFE COMPOSITE CYLINDERS

Betagas est une société de stockage et de vente de gaz. L'idée a découlé d'un besoin environnemental, voulant lutter contre la dégradation de l'environnement en abattant les arbres, surtout que, pour le fondateur de BETAGAS, d'autres méthodes plus modernes peuvent être utilisées afin de produire de l'énergie.

Berty Gatotozi
CHAIRMAN

Mireille NIJEMBAZI
CEO BETAGAS

En effet, si l'énergie est une condition importante pour le développement économique et social, elle peut causer des dommages à l'environnement si certaines mesures ne sont pas prises.

Le Burundi dépendant à 95% du bois pour le chauffage et la cuisson, une superficie d'une soixantaine de kilomètres carrés de forêt est détruite chaque année, signale Berty GATOTOZI, le chairman de BETAGAS. C'est dans cette optique que la société BETAGAS a vu le jour en 2021.
